

Assist Acidifier is designed to improve growth, performance, and reduce pathogenic bacteria in the gastrointestinal region. Research shows lowering pH in the stomach and small intestine improves digestion and daily weight gain.

Directions for Use:

SHAKE WELL PRIOR TO MIXING.

Dosage of Assist Acidifier is determined by your current drinking water pH.

To determine dosage complete the following steps:

1. Measure pH of your drinking water.
2. Add 2 ounces Acidifier per gallon of water and inject using a medicator 1:128. Allow 12-24 hours prior to increasing dosage.
3. Repeat above process until you reach your desired pH.
4. Recommend maintaining a consistent pH in drinking water between 6.0 - 7.0.
5. Acidifier can be injected using a parastolic pump.

Handling and Storage

Use only as intended. Though this product is non-toxic and non-hazardous it is not suitable for human consumption. The manufacturer assumes no liability, expressed or implied, in the use of this product.

Store this product out of direct sunlight in a cool dry area. For best results, use within 6 months.
